Imagined by Photographers, built by engineers, perfected by designers. This is Irix, the photographer's dream.

Swiss precision and ingenious Korean solutions make for a powerful combination. Irix lenses are designed to deliver top optical performance and match the demands of full frame matrix cameras.

Our wide-angle lenses successfully merge a short focal length with a large aperture. Our intelligent build combined with high quality coatings result in minimal distortion. With this guarantee, your Irix lens will quickly become your go-to tool.

At Irix, we have developed two, unique housing options to compliment our excellent optical performance: the Irix **Blackstone** and the Irix **Firefly**. We cater for various photographic needs, whether you opt for maximum weather protection, lightweight housing or low-light condition features, we have the lens for you. Firefly: The super lightweight, ergonomic and economic option. Blackstone: Ultimately rugged and durable, and fully weather resistant. Whichever housing you choose to suit your particular needs, you can rest assured that there will be no compromise on optical performance.
